WESRAIL II

Moultrie Manufacturing Company is proud to introduce the Wesrail II aluminum rail component system, the most advanced system ever offered. Free of cast fittings, all components in the Wesrail II system are machined from solid 6063 alloy. Because it uses no pop-rivets, sheet metal screws, adhesives or cast fittings, Wesrail II provides maximum strength and rigidity.

- Meets stringent specifications of major engineering firms.
- Meets or exceeds OSHA, ADA, ANSI/ASTM, ASCE, CFR, BOCA, ICBO, SBCCI and other code requirements.
- All fittings machined from 6063-T5 and T6 aluminum alloy with no cast fittings.
- Uses in line stair rail.
- Uses stainless steel screws and bolts with expansion tines for maximum rigidity. No pop rivets, sheet metal screws or adhesives.
- Posts are Schedule 80 6105-T5 and 6005-T5 aluminum pipe. Rail is Schedule 40 6105-T5 and T1, 6005-T5 and T1 aluminum pipe.
- Available in a variety of Class I 215R1 anodized finishes.
- Powder-coat finishes also available.
- Wesrail II railing is encased in plastic sleeves for protection during shipping, storage and installation.

WESRAIL

WESRAIL is an aluminum component pipe rail system, ideal for use in most handrail or guardrail applications. Engineered to fit together precisely into a rigid, sturdy and versatile system. WESRAIL meets OSHA and Building Code Standards. It is available in both anodized and powder-coat finishes.

PREFABRICATED

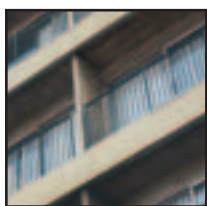

WESRAIL is available prefabricated from the Moultrie Manufacturing Company factory to assure a uniformly high quality assembly and to simplify field installation. Moultrie Manufacturing's design department will do take-offs and provide shop drawings. Available in lengths up to 18 feet.

COMPONENTS

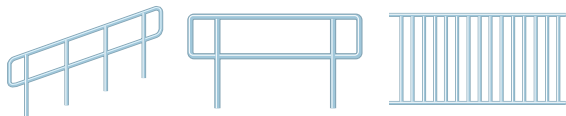

WESRAIL components may be assembled by a fabricator into any configuration to meet specific requirements. A Wesrail Engineering Manual is available to assist the fabricator. To maintain all the inherent advantages of the WESRAIL system, we recommend that the fabricators use WESRAIL pipe, extruded to close OD and ID tolerances and anodized for the closest possible color match to the WESRAIL fittings. The aluminum pipe is individually sleeve-wrapped in plastic for protection.

Visit our website for WESRAIL product specifications at:
www.moultriemanufacturing.com

WESRAIL WELDED RAILINGS

Many applications call for welded railing and WESRAIL WELDED is the railing to meet those requirements. Assembled and welded at the factory, it is then Class I anodized or powder-coated to customer specifications. WESRAIL WELDED is available in a wide variety of designs and in lengths up to 18 feet for ease of field installation. ALSO AVAILABLE IN WELDED STAINLESS STEEL.

RAILINGS REQUIRED FOR SAFETY

To protect individuals from injury, the law requires that handrails be specified by designers of water treatment plants, public facilities, factory walkways and other locations wherever there is potential for personal harm from falls or moving equipment. One of the safety issues usually checked by OSHA personnel is handrailings. In June 1976 the Health, Education and Welfare Department of the federal government set in place standards that "places of employment" must comply with "For Making Buildings and Facilities Accessible to and Usable by the Physically Handicapped."

ADA OSHA AND ASTM REQUIREMENTS

Both WESRAIL welded and component railings meet or exceed ADA handrail requirements, as well as all OSHA and ASTM handrail requirements. Available in all WESRAIL finishes.

Aluminum pipe railing components for handicap rails:

- Meet ANSI A117.1 and Uniform Federal Accessibility Standards for Handrail

- Both for new installations and retrofit

Availability of mechanical system:

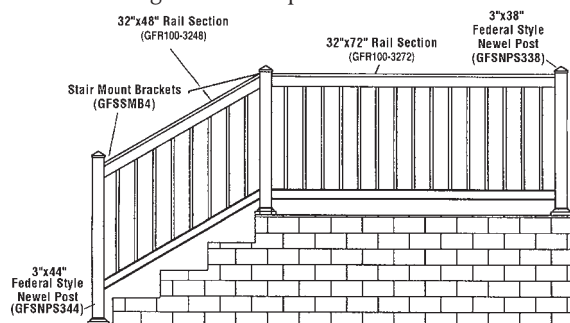

- Components unassembled
- Components prefabricated at factory

DECORATIVE RAILING

FEDERAL STYLE ALUMINUM RAILING

- Mechanical Railing
- Mounts 36" or 42" high
- 4', 6' and 8' sections
- 3/4" x 3/4" Picket - 100 Series
- 1 1/2" x 3/4" Picket - 200 Series
- Continuous rail available
- Durable powder-coat finish
- Easy to install
- Meets or exceeds building codes
- No exposed fasteners
- Use for straight rail or steps

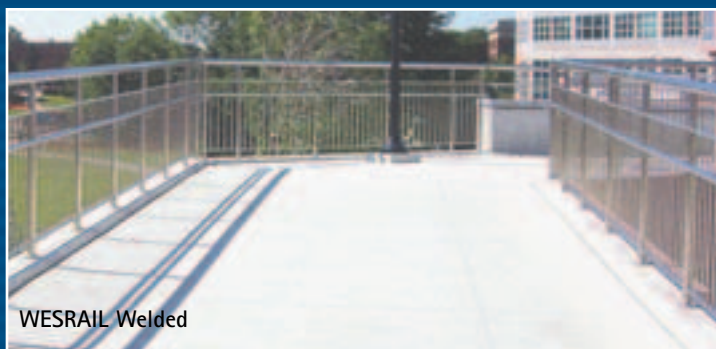

RAIL SPECIFICATIONS

6063 Aluminum 2.50"x1.57" Bottom Rail
 3.25"x2.06" Top Rail 3/4" Sq. Picket set 3-7/8" Apart
 Baked on Power-Coat Finish

ALUMINUM COLUMNS 06400

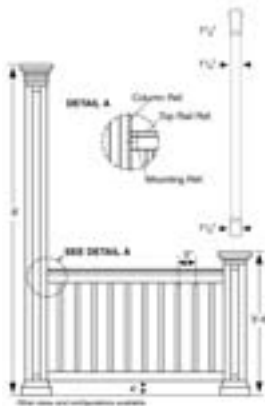

Moultrie Manufacturing Company offers a wide selection of aluminum columns to complement its Railing Design Solutions. They are ideal for homes, apartment buildings, offices or churches.

is Moultrie Manufacturing's brand of aluminum round and square columns. Extruded from 6063 alloy, our aluminum columns are less expensive and easier to install than wood or fiberglass columns and offer higher compressive strength and load bearing ability. Best of all, they come prefinished with a powder-coat finish for durability.

For more information on aluminum columns visit Sweets 06400/MOU or visit our website at www.moultriemanufacturing.com

DECORATIVE RAILING (CONTINUED)

PLANTATION RAILING - WELDED

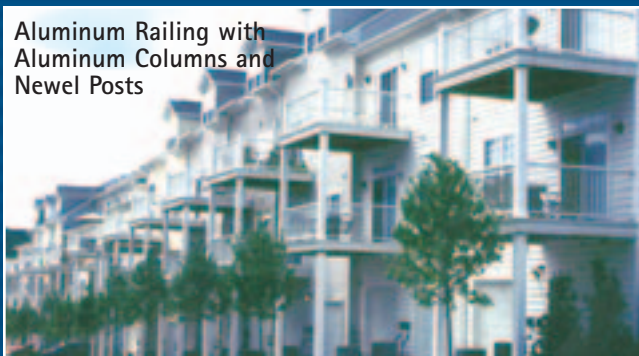

- Welded Railing
- Premium railing, available in lengths up to 10'
- Welded railing system—each section built to measurements
- Available in 36" and 42" heights
- 1 1/4" x 1 1/4" pickets
- Custom designs also available
- Durable powder-coat finish
- Easy to install
- Meets or exceeds building codes

ATLANTIC RAILING - WELDED

- Welded Railing
- Available with 3/4" square pickets or 1" square pickets
- Available in 4', 6' and 8' sections
- Special lengths also available
- Mounts 36" or 42" high
- Durable powder-coat finish
- Easy to install
- Meets or exceeds building codes

Plantation Style Columns, Railing and Newel Posts

Aluminum Railing with Aluminum Columns and Newel Posts

PVC RAILING & DECKING 05720

RAILING

- Galvanized reinforced top and bottom rail
- Precut, easy and quick to assemble
- 6', 8' and 10' sections, mounts 36" or 42" high
- Choice of 3/4" x 3/4" or 1 1/2" x 3/4" pickets
- Turned pickets and cottage pickets
- Available in white or sand
- UV stabilized for maintenance free durability

DECKING

- Lengths come in 8', 10', 12', 16' and 20'
- Boards are 5 1/2" wide, 1 1/4" thick
- Hidden screw channel with snap in cover
- Available in white, sand, or gray
- UV stabilized for maintenance free durability

FURNITURE & ACCESSORIES 02870

Handcrafted cast aluminum furniture and accessories enhance patios, lawns and gardens, as well as the home. Most of our designs are patterned after furniture found in early American and English gardens.

8" Traditional Square Columns and Newel Posts, PVC Railings

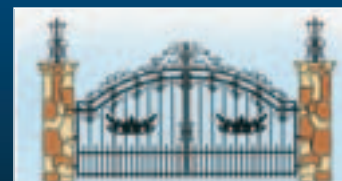

PVC Decking and Railing

GATES & FENCES

02825

Old South's beautiful aluminum ornamental gates and fences are virtually maintenance-free and will not rust or stain driveways and masonry.

Send or call for our Gates and Fences catalog, which is filled with many designs to choose from, as well as size and installation information.
