

# 4" 6" & 8" POST WRAP

## Product Description:

Post Wrap is manufactured of the highest quality PVC material. It is impervious to rain, snow, dirt, dust and most chemicals. Normal rainfall will remove most accumulated grime, keeping your Post Wrap looking great year round. A mild household cleaner may be used if needed.

## Tools and Supplies Needed:

Measuring tape

Saw with a fine tooth blade

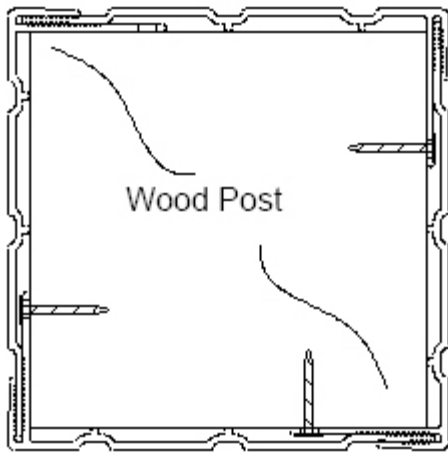

PVC Cement (optional)

Hammer and roofing nails recommended

## Installation:

- 1) Measure the length of Post Wrap needed and cut to length using a fine tooth saw. Then, place the first piece of Wrap against the post and fasten through holes provided on the fastening flange.
- 2) Insert the flat end of the second piece of Post Wrap into the assembly slot of the first piece. Again attach to the post using fasteners in the holes provided on the fastening flange.
- 3) Repeat the previous step to fasten the third piece of Post Wrap.
- 4) When attaching the last piece of Post Wrap, once again begin by inserting the flat end into the assembly slot of the previous piece. Next slide the slot of the fourth piece over the flat end of the first piece. PVC Cement may be used.
